Diploma in Information Technology 2017

Shreerang Vidyalaya English Medium, Thane Batch of 2014

SSC 2014

## Work Experience

Mindcraft Software PVT ltd. (Mumbai,India) JUNE 2021 – Present

IIB/App Connect Developer Sr. Consultant

- **Approx 3 years of IT experience in analysis, design, development, and testing, with good experience in configuring, installing, performance tuning, deployment, and administration of IIB, App Connect, JAVA, WMQ on Linux and Windows.** Having experience with IIB, IBM ACE, DataPower (IDG), MQ, Oracle SQL, and Restful Web Services. Experience with MQ Series and Web Services(both **SOAP and HTTP** based). Experience with XML,JSON,MIME,BLOB,and multipart format message parsing and transformation.
- Mentored a team of developers with no prior IIB experience in **IIB development and ACE Development and administrator for two projects. Worked as a Technical Lead on two projects, managing the projects with a team of freshers with a team size of 8 people. I am an effective communicator with excellent interpersonal, analytical, and client-servicing abilities. Involved in all phases of the software development life cycle, including requirement gathering, designing the application, implementing the design, testing, and maintenance support. Also involved in the implementation of Requests for Change, development activities, and resolving application service requests and handling incidents.** Good experience in creating domains with importing and exporting services, Configuring and developing MPGW services, and implementing one-way and SSL in **Datapower.**
- **Design, develop, test in WebSphere Message Broker flows using IBM Integration Bus (IIB) v10.** Worked as a key member in the development of the migration of one module for triggering SMS to customers. Previously, existing services were calling the Apprise Alert SOAP-based API to trigger. We have migrated to the new InteractDX XML-based REST API.
- Design, develop, test, administer, and service in ACE. Played a key role in each and every module as a developer and administrator. This is a finance-based project developed for AFL users, which helps users apply online for consumer durable loans through API integration modules. Shaikh HaiderAli Abdul Shakoor has been a key member of each project team he has worked on by **professionally providing his technical skills with dedication and determination, and clients have been very satisfied with his work performance.**

## Projects

Axis Finance Ltd.

- This is a **finance-based project** developed for AFL users, which helps users apply online for consumer durable loans through an **API integration module.**
- Developing Rest API services exposed in the AFL Middleware Framework to be consumed by **AFL Core systems(e.g. INDUS, PENANT, AFL Website, BBPS).**
- Involved in all phases of the software development life cycle, including requirement gathering, designing the application, implementing the design, testing, and maintenance support.**Played key role in each and every module as a developer and admin.**
- Designing and developing involved in almost all modules, such as **Karza, Bureau One, CKYC, HUNTER, POSIDEX, BBPS, NUPAY,LEEGALITY,BQS** and **Axis Bank Internal applications.**Project with development in ACE, Data Power and Java.

- Created and deployed bar files using the toolkit and command line utilities. **Worked as a Technical Lead. Also, Involved in resolving production issues. Design, Development and Debugging of message flows in App Connect Enterprise Toolkit(11.0.0.3). Developed MPGWServices for API gateway in DataPower as per the requirement.**

#### **Ratnakar Bharat Limited Bank.**

- Banking Domain project involving development in IIB. The project is already built and live. We have migrated one module used in all APIs for triggering SMS to customers. Previously, existing services were calling the Apprise Alert SOAP-based API to trigger SMS.**We have migrated to the new InteractDX XML-based REST API.**
- **Analysed working of module to be migrated in each API.**
- Involved in all phases of the software development life cycle, including requirement gathering, designing the application, implementing the design, testing, and maintenance support.**Played key role in each and every module as a developer.**
- The module, originally based on SOAP API, has been migrated to a REST XML-based API. **I made the necessary changes in request mapping according to the new request structure in ESQ.**
- Made necessary changes, such as HTTP request URL, HTTP Protocol, Timeout, etc., in the **HTTP request node properties.**

#### **Technical Skills**

---

His technical experience includes **IIB, DataPower (IDG), MQ, Oracle SQL, and Restful Web Services. Designing, developing, testing, administering, and servicing WebSphere Message Broker flows using IBM Integration Bus (IIB v9) and ACE Version 11.0.0.3.** Configuring and developing MPGWServices, one-way, and SSL implementation in DataPower. Experience in testing using **POSTMAN and SOAP UI.** Involved in the implementation of **Requests for Change, development activities, and resolving application service requests and incident handling. An expert in SSL Implementation (HTTPS) at both the NODE and SERVER levels.** Experience with XML, JSON, BLOB, and MIME.

#### **Certifications**

---

##### **Data Scientist**

*Batch of 2022*

**September 2022**

*Simplilearn*

##### **Full Stack Developer**

*Batch of 2019*

**Dec 2019**

*IIDE*

#### **Achievements**

---

- Received a quarterly award for excellence in the months of July, August, and September for resolving a **long-pending commercial CIBIL issue.**
